

5<sup>th</sup> Edition— Available in Early April

## Global Science: Energy, Resources, Environment Poised to return to being the largest-selling, integrated environmental science high school textbook in North America

Four and one-half years and \$73,376 were invested by the Institute to aid the development of the new 5th edition of **Global Science**.

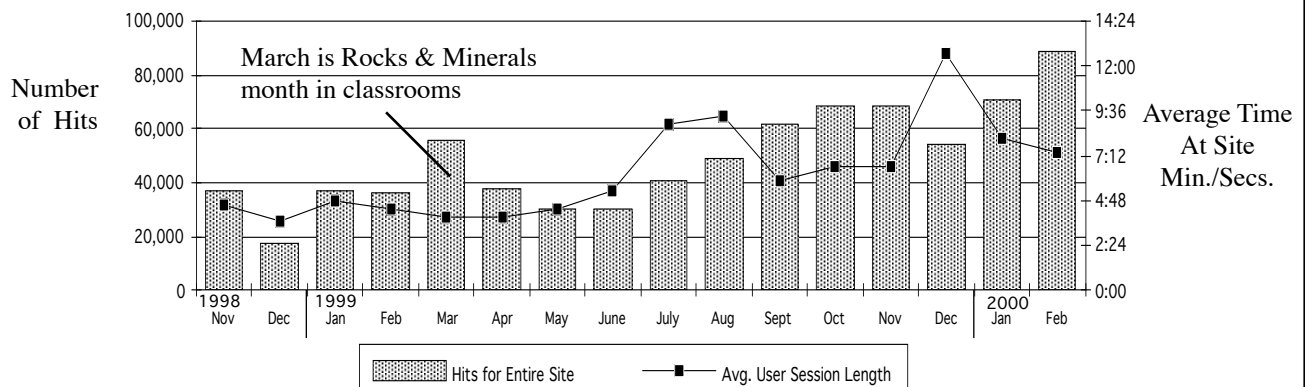

The role of MII is to supplement the resources of the publisher and author, so that shortcuts are not taken in the research and collaboration with experts, so that the content of the text will be as thoroughly researched and as accurate and balanced as possible.

It is this philosophy that aligned MII with the author and publisher of *Global Science* 20 years ago. And that alliance has proven to be a proper and effective method to develop integrated, environmental science textbooks that will be used in our schools. *Global Science* is being recognized as a fair, accurate, and balanced presentation of the issues confronting our society. The new text is available from Kendall/Hunt by calling 1-800/228-0810.
